

C O N G O™ JR

MASTER PLAYBACK WING

Thank you for purchasing this Congo jr Master Playback Wing from ETC!

Please note:

This Master Playback Wing is supplied with all necessary cables to allow you to use the wing. You may choose to connect the wing permanently to the console or to use it as a stand-alone accessory, connected via a USB cable.

When connected to the console, on either side, all connections are made by the visible connectors on the console and wing sides. **NO EXTERNAL CABLING IS REQUIRED.**

If you connect the wing to the console physically and still have the external cables connected, no harm will come to the wing or the console, but you may see **UNEXPECTED BEHAVIOR** of the console and wing on shut down. It is not necessary, and therefore not recommended, to have the external cables connected when the wing is physically connected to the console.

When using the wing as a stand-alone accessory, it is recommended to connect the cables and start the system in the following order:

- 1) Connect Power and USB to the Console.
- 2) Connect Power to the wing.
- 3) Connect USB to the Wing.
- 4) Start up the Console.

On shutdown, the wing will remain powered up, as it is connected to a separate power supply. Please unplug the power to the wing to shut it down completely.
