

C O N G O™ JR

Thank you for purchasing this Congo jr lighting control console from ETC!

Please note:

The Congo jr console does not contain an internal speaker. If you wish to use the audio features of the Congo software, such as the fade completion sound, or if you would like to hear the audio portion of the built-in tutorials, you will need to use either an external speaker or headphones connected to the audio output port on the rear panel.

Volume control for the external speaker is available within the Congo software by pressing and holding the SETUP key while moving the level wheel.
