Creating a Custom Fixture – Emphasis

You don't need to download a separate personality editor to create a custom fixture for Emphasis. There is a Fixture Creation Editor already installed on the Emphasis Server.

- 1. Boot the Emphasis Server up. The Software will load and open a previously saved show.
- 2. From here, click on [File], [Close].

4. Once the show is saved it will take you back to a blank screen with the Emphasis logo in the center of the screen. From here go to the [Options],[Create new fixture...] this option will open up a popup window where you can create a new fixture.

5. Continue to answer all the questions and then open up a new show. Go to the Library and select the custom fixture you've created and insert it into your plot.
