

emphasis v2.0.1

Welcome to the latest version of software for your Emphasis® Control System!

Included with this upgrade kit you will find three CD-ROMs for upgrading your Emphasis Server, and floppy disks for upgrading your Express, Expression or Insight facepanel. Full instructions are available in the accompanying Release Notes, along with details of new features, and bugs fixed in this release.

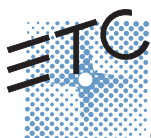

Please Note: Keep the CD's in a safe place – they are also your recovery disks, if for any reason you need to reinstall the server software.

Also in this kit you will find a CD-ROM that has the matching release of WYSIWYG software for the WYSIWYG package that you received with your Emphasis Control System.

Shortly after new software is released, we run a “new features” webinar event and encourage you to participate! These are online seminars with Emphasis experts from ETC, covering new features, tips and tricks and answering your questions. Watch for more details as we confirm future events.

As always, if you have any questions regarding this upgrade, please feel free to contact Technical Services at any of the numbers listed in the Release Notes.

Enjoy lighting with Emphasis!
