emphasis™

THE NEW LIGHTING CONTROL SYSTEM FROM ETC

Give your Expression® Emphasis!

Are you one of our more than 10,000 Expression family owners?

Don't throw away your old console.

Don't learn a completely new system.

Don't discount the lighting control you rely on and trust.

Just add Emphasis!

Let your ETC dealer or representative know that you are interested in upgrading your existing console to an Emphasis system.

Purchase the Emphasis server from ETC with your chosen channel count and WYSIWYG™ functionality level. If you run DMX from your console now, that will function just the same. If you have an ETCNet system, we will need to verify that your other network devices are suitable for an ETCNet2 system.

Then get ready for more than you *ever* expected when you first bought your ETC console!

Extras

• Emphasis is a native product on ETCNet2™ network. All our new networking equipment is compatible with Emphasis, including DMX Nodes, Video Nodes and integration with Unison® Architectural Control.

• ETCLink™ is on ETCNet2. Get all the benefits of full graphical reporting and error logging with WYSILink™!

• Upgrading from Expression 2x or Insight 2x? We have a Moving Light Module – a bolt on wing with encoder wheels & pages to give you all the hardware benefits of the newer consoles!

How does it all work?

emphasis = server + channels + your console!

server
2 choices

• 2D – full console feature set. WYSIWYG *Report* functionality: paperwork & presentation tools, data tasks, 2D CAD drafting. WYSIWYG *Report* stand-alone software included

• 3D – full console feature set. WYSIWYG *Perform* functionality: complete visualization, rendering, 3D CAD drafting package. WYSIWYG *Design* stand-alone software included

channels
4 options

• 500 channels
