

ETC Release Note

Eos® Family Lighting Control Software

Product Line:	Eos Family Lighting Control
Description:	Version 2.7.2 System Software
Engineering Change Master (ECM):	500019361
Effective Date:	2018-06-28

Purpose

2.7.2 addresses a number of known issues found in the 2.7.0/2.7.1 software releases. It also introduces a change to handling summary views, that uses a "majority rules" display construct. See [Key Enhancements in v2.7.2](#) on page 2 for more information. This release also addresses a critical bug where Undo can revoke changes beyond the desired undo point if Tab 100 (the manual) is open.

It is recommended all users of 2.7.0 or 2.7.1 upgrade to this version at the earliest possible time.

For any questions relating to the contents of this release or the behavior of this software, please contact ETC Technical Services at the office nearest you. A list of ETC offices is given at the bottom of this page.

Availability

You may obtain this release of software by downloading it from the Downloads section of the ETC website, www.etconnect.com.

Documentation

- For Eos Ti®, Eos®, Gio®, Gio @ 5®, Ion Xe™, and Element 2™:
 - Eos Family v2.7.2 Operations Manual Revision A
- For Ion®:
 - Ion v2.7.2 Operations Manual Revision A
- For Element™,:
 - Element v2.7.2 User Manual Revision A

Note: *Version 2.7.2 user manuals are available on ETC's website, www.etconnect.com. Please note that the version of documentation available on the console is version 2.7.0.*

For consoles running Windows 7, the user manual is available for viewing on Tab 100. For devices using Windows XP or Mac operating systems, the user manual can either be viewed on the ETC website, or a pdf version can be downloaded.

Please keep this release note with your user manual for descriptions of the newest features, changes and bug fixes in Eos.

ETC manuals can be downloaded free of charge from ETC's website at www.etconnect.com. They are available in portable document format (pdf), and viewable with Adobe® Acrobat® Reader™ v8.x and later.

Affected Products of This Release

The following Eos Family products are affected by this software release:

- Eos Titanium
- Eos

Corporate Headquarters ■ Middleton, WI, USA ■ Tel +608 831 4116 ■ Service: (Americas) service@etconnect.com

London, UK ■ Tel +44 (0)20 8896 1000 ■ Service: (UK) service@etceurope.com

Rome, IT ■ Tel +39 (06) 32 111 683 ■ Service: (UK) service@etceurope.com

ETC Release Note

Eos Family Software v2.7.2

- Gio
- Gio @ 5
- Ion Xe
- Ion Xe 20
- Ion
- Element 2
- Element
- Eos Remote Processor Unit (RPU)
- Eos Remote Processor Unit 3 (RPU3)
- Ion Xe Remote Processor Unit (RPU)
- Ion Remote Processor Unit (RPU)
- Net3 Remote Video Interface (RVI)
- Net3 Remote Video Interface 3(RVI3)
- ETCnomad®, (PC & Mac Client/Offline)
- ETCnomad Puck®

Key Enhancements in v2.7.2

- Enabling OSC USB Devices Added to Setup>System>Show Control>OSC
- For all summary views, including flexi cells off, Eos will display content when using referenced data on a majority basis. If there is no majority, a plus sign (+) is displayed. When there is a majority winner, that value and a plus sign will be displayed in superscript when not all parameters are set to that reference. In the intensity field, the first or master intensity is displayed. Other intensity values will be displayed in superscript if not at their default setting, with a plus sign if they are not all at the same value.
- Added syntax support for [.] [0] to select only the master channel of multicell fixtures. This can be used instead of [Shift] & [.]

Key Enhancements in v2.7.1

- Bug Fixes

Issues Corrected in v2.7.2

- RND 0047361 PSD can take 500ms to refresh
- RND 0047326 Encoder display: Pan/tilt parameters can be hidden if a fixture does not have certain parameters
- RND 0047301 Undo may undo more than expected while Manual tab is open
- RND 0047255 ETCnomad Win10 Shell: Cannot install any fixture library updates without running shell as admin
- RND 0047234 EOS Always Outputs sACN in "Ratified" format, the "Draft" format setting is Ignored
- RND 0047212 Fixture Editor: Changing from 8b to 16b leaves an out of date/default value in the LDMX field (usually 1)
- RND 0047211 Fixture editor rejects overlapping 8 bit address edits
- RND 0047196 OSC: RFR does not consistently display NPs in ML controls
- RND 0047146 Homing a global FX master sets fader to 0% rather than 50% of fader length (same as 100% FX master)
- RND 0047127 Show Control Setup buttons ignore held Help key
- RND 0047107 Allow users to disable lighthack/OSC USB devices through Setup
- RND 0047079 Fan of intensities not preserved when using the level wheel
- RND 0047066 Multicell: Mark earliest M not working correctly with Cell Masters
- RND 0047050 Fixture Editor: Cannot add Lamp Controls to a profile that doesn't have at least one
- RND 0047039 Multicell: Lamp control buttons missing from some fixtures
- RND 0047033 MC, Subgrouping: (Chan A) + (Chan B Cell C) is interpreted as (Chan A Cell C) + (Chan B Cell C)
- RND 0047032 Multicell: Lamp control buttons are displayed in gray text instead of white text
- RND 0046989 Magic Sheets - add RGBW mode to sACN item
- RND 0046987 Multicell: fanning Palettes across channels is not subgrouping cells
- RND 0046985 Channel List Text: Only Display "Cells Only" When Cells Are In Numerical Order

ETC Release Note

Eos Family Software v2.7.2

Issues Corrected in v2.7.2 [Continued]

- RND 0046978 Fixture Editor Refresh: cannot change 16b parameter to 8b
- RND 0046967 [Help] Some Help Links Don't Work
- RND 0046965 Effects: effects with short step times, and 0 fade times sometimes fade instead of snap
- RND 0046960 In live, Intensity block cues sometimes do not display blocked intensity in white
- RND 0046957 Multicell: Make Chan n cell 0 valid syntax for Minus Cells
- RND 0046951 Motor Fader Wing (MFW): toggling sub pages can cause the MFW to reject a negative move
- RND 0046848 Multicell: Partitions: Do not allow a partition to contain cells, but not their master
- RND 0046838 Partition Flexi + Active Partition CIA button doesn't highlight when active
- RND 0046837 {Flexi + Use Partition} coupled with the Active Partition including some Multicell fixtures may not display all channels.
- RND 0046835 Multicell: Partition list display: Partition channel list displays incorrectly with a range of multicell channels.
- RND 0046830 Multicell: Clicking to select a whole numbered channel after a cell keeps selecting cells
- RND 0046778 ETC ColorSource Linear Multi-cell 1 DMX Channel Modes Do Not Work Properly
- RND 0046710 Eos ASCII Import/Export: Multicell Handling in Subgroups
- RND 0046691 Magic Sheets: Text above Global FX x2 x3 faders doesn't display x2 or x3
- RND 0046690 Fader Displays: Effect Rate and Effect Size values on fader handles aren't always displayed to new min/max
- RND 0046682 Multicell: Adding range of channels to stepbased effect is not grouping cells together
- RND 0046659 Setup: toggling [display reference labels] affects channel display, but does not toggle the gear menus checkbox
- RND 0046655 Multicell: +% and -% work correctly, but display odd channel selection on command line
- RND 0046569 Multicell: Chan n Cell y thru z - x does not ignore cell x
- RND 0046481 Multicell: Clicking on root channel should select Master and its cells
- RND 0046398 Multicell: changing type can create a patch overlap
- RND 0046294 Multicell: Cannot use +% plus percent or -% minus percent multiple times
- RND 0046223 Multicell: Some features of Color Picker (Tab 27) don't work with Multicell
- RND 0046181 Multicell: Flexichannel: when [flexi cells off] is enabled, root channels levels should be a summary of root and cell levels
- RND 0046093 Multicell: Rem Dim should only affect MC intensity but not cells' intensity
- RND 0045270 Ctrl key doesn't work as a single modifier in some hardware configurations
- RND 0038371 Live Summary: Crossfade levels in subscript text don't show up well at +100/-100
- RND 0031244 [Chan x Thru Y +10%] should include all channels, if all are at 0

Known Issues Remaining in v2.7.2

- RND 0046239 Port/Offset patching should be allowed across a universe boundary, and should not move the patch of a Multicell MC
- RND 0045965 Fixtures with Half Slot Wheels Cause Broken Control in non-Half Slot Modes
 - Workaround:** Continue to spin the encoder until the output is restored.
- RND 0045945 Fixture Parameter Modes Are Displayed on a Separate Encoder
- RND 0045818 About: Parameter Usage: Pixel mapped addresses do not show in about as patched addresses but do count towards dongle count
- RND 0045725 Snapshot: Open new tabs in this frame isn't saved in snapshot
- RND 0045694 Support multicell fixtures in ASCII Export/Import
- RND 0045144 OSC - /eos/out/event/cue/<cue list number>/<cue number>/fire doesn't send when a custom OSC Cue Send String is set
- RND 0044658 A newly reset split PSD display will snap top split to smallest possible height on tab refresh or move
- RND 0044256 CSV Export/Import: Cue "At Release" attribute missing
- RND 0044245 OSC Messages aren't all sent via TCP
- RND 0044242 Possible RDM crash after loading a showfile with RDM devices offline
- RND 0043999 CSV Export: default Cue time not written
 - Workaround:** When Int Fade Up time is missing, analyzing tool could either assume default fade time = 5 sec, or use the duration time as default time.
- RND 0043750 CSV Export/Re-Import: issue with cue FCB times
- RND 0043194 Mobile RFR - Display issues with Landscape mode
- RND 0043096 Can't assign targeted macro to a device whose name starts with a minus
- RND 0042765 Mac: Add the ability to save logs from the main Eos app, without having to exit to the shell - for Mac as well
- RND 0042577 Recognize UDP strings as properly formatted OSC-style strings

ETC Release Note

Eos Family Software v2.7.2

Known Issues Remaining in v2.7.2 [Continued]

- RND 0042324 Expanded Channel display or PSD doesn't update zoom level with parent live display
- RND 0040340 Make Gio_Encoder_Display an available Softkey in Macro Editor
- RND 0040235 Magic Sheet: Macro buttons cannot be assigned a Target# higher than 9999
- RND 0039659 Shutter controls cover up encoders when expanded
- RND 0039541 The master fader in the PSD fader ribbon doesn't display the filter icons
- RND 0032257 Channels/addresses in use via a pixel map should respect patch attributes proportion and curve
- RND 0030823 After backup transfers to master, "Save" no longer remembers show file name
Workaround: Save using the "Save As" function instead
- RND 0030257 Captured channels manual effects not recording into existing sub
- RND 0029823 2 pixmaps with the same server channel can output incorrectly.
- RND 0029769 Custom fixture editor giving error when editing mode ranges
- RND 0029752 Rate overrides less than 10 running too slow
- RND 0029193 [Magic Sheet 1 Copy To Magic Sheet] resets the command line, [Magic sheet 1 CopyTo 2] does not
- RND 0029155 Macro that turns on/off the internal SMPTE clock doesn't work in the show control display.
Workaround: Set the macro mode to Background.
- RND 0028654 When manually starting and stopping an effect, we should be using the entry/exit time to control the fade in and out.
- RND 0028367 Virtual Keyboard - Press and hold keys should latch them down until next press
- RND 0027991 Undo selection does not properly track to different devices of the same user.
- RND 0027983 Undoing manual values snap to prev level instead of using Manual time in setup
- RND 0027148 [Shift + Escape] to lock desk can't be learned into a macro
- RND 0027004 USB RFR does not work if you restart Eos on Windows 8.1
- RND 0026147 When shutter strobe is marking, intensity outputs nonzero value output strobe
Workaround: The user can either Disable automark on that cue, or put the shutter mode change in a follow cue.
- RND 0020943 Element – unable to change Sub pages via a Macro. Multikey press is not learned.
- RND 0016827 Snap Intensity Params are fading on timed HTP sub bump
- RND 0011798 Build Step effect with Stop/Hold exit, stops at off states, not on states
- RND 0011727 Multiple Cue List PSD doesn't allow paging of bottom cue list

Compatibility

ACN

The software is compatible with all Net3™ products that meet or exceed ESTA ratified standard ANSI E1.17 2006 Architecture for Control Networks (ACN) and ANSI E1.31 Streaming ACN (sACN).

ETCNet2 Network Compatibility

This release is compatible for the exchange of EDMX and/or configuration information with the following ETC hardware and software:

CAUTION: *Eos ETCnomad (Mac and PC) and Puck do not support ETCNet2 protocol. See the [Incompatibility](#) section.*

- Eos® Family Lighting Control System - Version 1.0.0 and later software.
- Cobalt™ Family Lighting Control System - Version 4.0.0 and later software.
- Emphasis® Control System - Version 1.4.0 and later software.
- Obsession® II Control System - Version 5.1.x software.
- Network Configuration Editor (NCE) - Version 4.x.x and later software.
- Net3 Four Port Gateway (ETCNet2 mode) - Version 4.0.0 and later software.
- ETCNet2 DMX Node - Version 4.0.6 and later software.
- ETCNet2 Two Port Node - Version 4.1.4 and later software.

ETC Release Note

Eos Family Software v2.7.2

- Unison® - Version 1.9.x software.

Incompatibility

Eos v2.7.2 is incompatible with hardware and software running ETCNet2 software prior to those listed above.

CAUTION: *Until your ETCNet2 nodes and Net3 gateways running in Net2 mode are updated to the versions listed below by NCE v4.2 or later, you must turn off/disable the (DHCP) Address Server in the Eos Configuration Utility (ECU). In the ECU: Settings>Network>Net3 Settings. Make sure "Enable Address Server" is unchecked.*

Software Versions that are compatible with DHCP servers:

- ETCNet2 DMX Node (4.0.6)
- ETCNet2 Two Port Node (v4.1.4)
- ETCNet2 Video Node (v4.0.2)
- Net3 Four Port Gateway (ETCNet2 mode v4.0.3 or later)

Eos v2.7.2 is incompatible with hardware and software running ETCNet1.

Eos ETCnomad (Mac and PC) and Puck are incompatible with hardware and software running ETCNet2 protocol.

Installation Instructions

For new Eos Family consoles, ETC has implemented a method to include the latest software installers directly on the console's hard drive when they initially ship from ETC. For future releases, you will need to download the Eos Family software from the ETC website, www.etconnect.com.

Note: *All processors on the Eos Family network must be running the same version of software. Therefore, you must also update all RVIs and RPUs when you update your console.*

Installer Archive

To check to see if a newer version of Eos software is available on your console, navigate to **ECU>Settings>General>Software Update**.

When the software update window launches, it will show you the available Eos versions found.

If there is an available update and you wish to install it, follow the on screen steps for updating the console's software.

The Installer Archive can also be used to save multiple software versions onto your console's hard drive in case you wish to downgrade.

Software Installation

To update your console or offline software to the v2.7.2 release, you will need to download it from the ETC website, unzip the file, load it to a USB device, and then transfer it to your console from the USB port using the Eos Configuration Utility (a.k.a. Eos Shell).

To update your console to v2.7.2:

- 1: Download the software from the ETC website, www.etconnect.com, on the appropriate product page.
- 2: Unzip the file.
- 3: Transfer the unzipped file to a USB memory device.

ETC Release Note

Eos Family Software v2.7.2

- 4: Insert the USB device containing the software into an available USB port on the console.
- 5: Open the Eos Configuration Utility (ECU - Also known as the Eos Shell) either by exiting the Eos Family software (**Browser>Exit**) or by starting up the console and clicking on the **{Launching in...}** button. The ECU screen will open.
- 6: Click on the **{Settings}** button. The settings window will open.
- 7: Click on the **{General}** button inside of the settings window. The general settings will appear in the window.
- 8: Scroll down in the window until the **{Software Update...}** button is visible. Click this button.
- 9: This scans the root directory of all available drives (USB drives) for valid installers.
- 10: When the "Update Software" dialog pops up, click on **ETC_EosFamily_Console_v2.7.2.17**, then click **{Install}**.
- 11: The software will copy to the hard drive before launching a standard Installshield application to direct you through the install.
- 12: Click **{Next}** to start the installation process.
- 13: Read and accept the terms of the license agreement and click **{Next}**.
- 14: A dialog box will open warning of losing show data if not saved to disk. Click **{Yes}** to continue. The console will install the software.
- 15: Click **{Finish}** to complete the installation process. The console will automatically reboot and then enter the ECU welcome screen.

ETCnomad (Client/Offline) Software

For system requirements and installation instructions for Windows and Mac clients, please see the ETCnomad Setup Guide.

Firmware Updates

The following table shows the current firmware versions. For information on updating firmware, please see the ECU appendix of your console's manual.

WARNING: A restart of the console is required for every module updated.

Note: *Single DMX port Gadgets and devices with IO cards that have a Phone Remote connection must use the **{Upgrade IO Firmware}** button in the Maintenance tab of the ECU. Other IO cards and Gadget II can be updated using the firmware update window.*

Desk	Module	Current Firmware Version

Note: **For Elements that have Windows 7 installed but do not have firmware v1.2.90 or higher, please contact ETC Technical Services.*

Local RDM Firmware Update

New firmware is required for expanded functionality.

- Gadget -1.4.2.9.0.5

ETC Release Note

Eos Family Software v2.7.2

- IO Card -1.4.2.9.0.5

The new firmware is required for the use of Local RDM on any platform, and required for individual configuration of multiple IO devices on any platform.

Firmware can be updated from a console or PCs running Win7/8.1. Mac OS does not currently support firmware updates.

Dual NIC Update

This feature allows the console to be connected to two separate networks. Dual NIC is available on Eos Ti, Gio, and RPU3. For the second NIC to work fully, you must also install the ETC GCE Net3Svc v3.1 or higher. GCE is available for download from the ETC website (www.etcconnect.com). The new hardware for Ion, Element, Net3 RVI, and Ion RPU also include the dual NIC feature, but ship with GCE already installed.

Example applications:

- Support 2 separate Net3 Gateways, networks or sACN devices
- Support 2 separate networks (e.g., one sACN, one Artnet, or one sACN and one Network Attached Server)
- One network for 'output' devices (sACN, EDMX, Artnet...) and one network for controls an interfaces (Consoles, RPUs, Show control)
- One combined network and one limited traffic for wireless devices

Note: *The two Ethernet ports must be configured to separate networks (subnets).
For proper operation, the two ports must NOT be connected to the same physical network.*

To enable the second network port

To configure the second Ethernet port on your console to match factory defaults, follow the instructions below. Otherwise, you may configure the second port to match your system requirements.

- 1: Open the Eos Configuration Utility (ECU - Also known as the Eos Shell) either by exiting the Eos Family software (**Browser>Exit**) or by starting up the console and clicking on the **{Launching in...}** button. The ECU screen will open.
- 2: Click on the **{Network}** button. The network window will open.
- 3: Set the IP address for port 2.
- 4: IP Address - 192.168.xxx.101
- 5: Subnet Mask - 255.255.0.0
- 6: Enable DHCP Service for Port 2.
- 7: Click **{Accept}**. A reboot of the desk is required.
